

Art. Nr.: **PDL-1275**  
Bezeichnung: **PDL-1275**

### Product Physical Specifications

| BCI   | Model  | Voltage (V) | Dimension (mm) |       |        |              | Quantity(Liters) | Weight(kg) |
|-------|--------|-------------|----------------|-------|--------|--------------|------------------|------------|
|       |        |             | Length         | Width | Height | Total Height | Electrolyte      | Battery    |
| GC 12 | L-1275 | 12          | 329            | 181   | 245    | 278          | 6.8              | 38.5       |

### Electrical Specifications

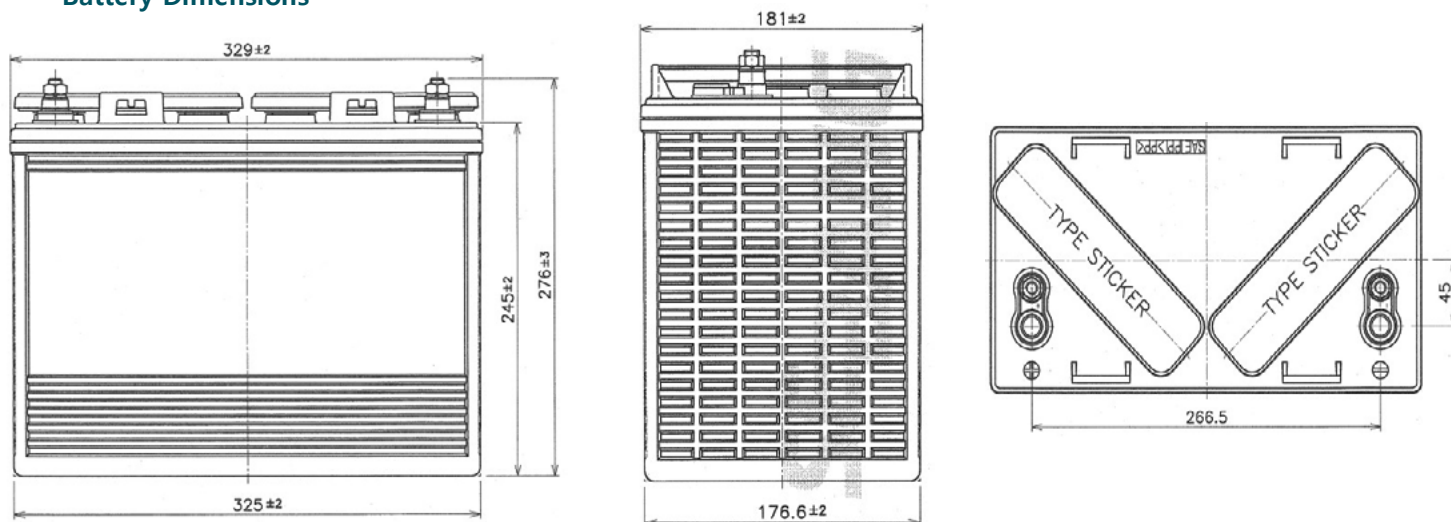

| Type   | Capacity Minutes |          |          | Capacity Amp-Hours(AH) |       |
|--------|------------------|----------|----------|------------------------|-------|
|        | @25 Amps         | @56 Amps | @75 Amps | @5Hr                   | @20Hr |
| L-1275 | 280              | 102      | 70       | 120                    | 150   |

### Terminal Configurations

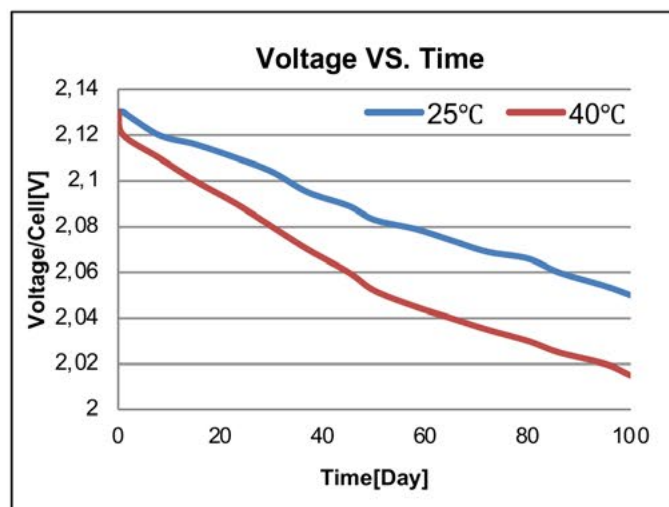

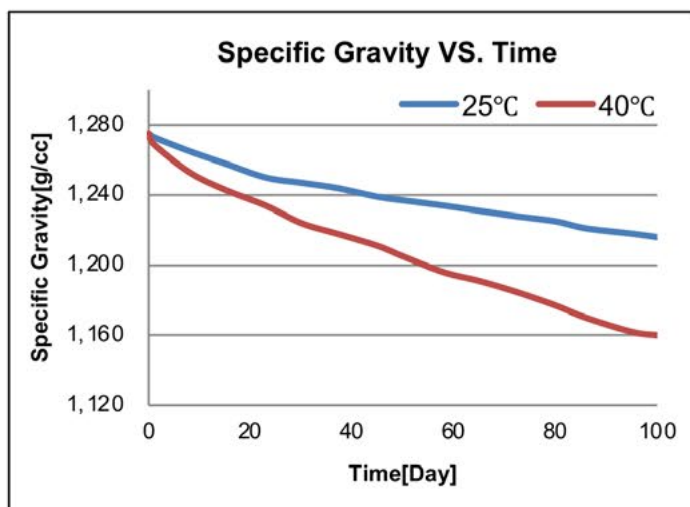

| WNT                                                                                | Wing Nut Terminal                                                                                     |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
|  | Terminal Height mm(Inches)<br>33(1.29)<br>Torque Value kgf*cm(Nm)<br>110-120(10.8-11.8)<br>Bolt 5/16" |

| EUT                                                                                  | Embedded Universal Terminal                                                                |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
|  | Terminal Height mm(Inches)<br>27.4(1.08)<br>Torque Value kgf*cm (Nm)<br>110-120(10.8-11.8) |

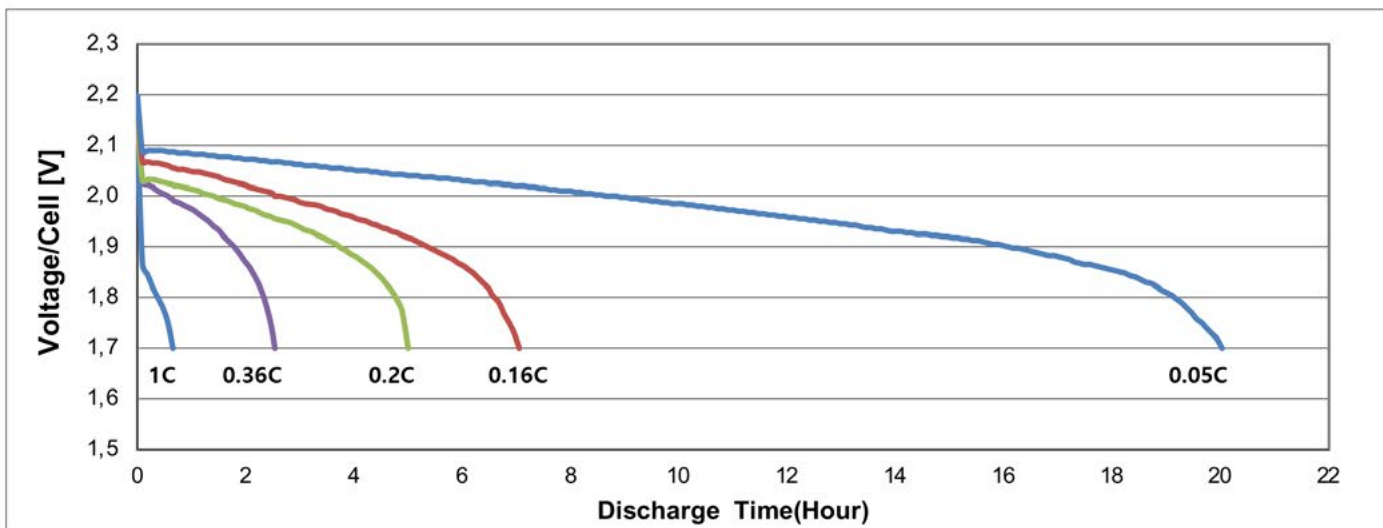

### Battery Dimensions

### Self Discharge Data

### Capacity By Discharge Current

### Cycle Service Life : BCIS-06 [DOD 100% \_ 27°C]
